Profile / Summary

Electronics and Computer Engineering undergraduate with experience in full-stack and AI-powered application development. Strong problem-solving skills with adaptability, teamwork, and hands-on experience in open-source and cross-functional projects.

Educational Qualifications

Bachelor of Technology in Electronics and Computer Engineering
Amrita Vishwa Vidyapeetham, Kerala, India — Aug 2023 – Present

Secondary and Senior Secondary Education (Class 10th & 12th)
Amrita Vidyalayam, Kerala — 2013 – 2023

Projects

CeeVee – Resume Skill Gap Analyzer *March 2026*
Next.js, TypeScript, Node.js, PostgreSQL, Prisma, Groq API, Fuse.js, Recharts, JWT, Vercel, Neon

- Built a full-stack AI-powered resume analyzer using Next.js 16, Node.js, and PostgreSQL that parses resumes, extracts skills, and matches them against job descriptions
- Integrated Groq LLaMA 3.3 70B for intelligent skill extraction, normalization, bullet point rewriting using the STAR method, and personalized learning roadmap generation
- Implemented PDF/DOCX parsing pipeline with multi-layer file validation to detect and reject non-resume documents before AI processing
- Designed a JD matching engine using fuzzy search (Fuse.js) to compute skill match percentages, identify missing skills with priority ranking, and suggest learning paths
- Built JWT-based authentication with secure HTTP-only cookies, protected routes via Next.js middleware, and full user session management
- Developed an ATS scoring system with a point-based rubric evaluating keyword density, formatting quality, impact wording, and skill coverage
- Deployed on Vercel with a Neon PostgreSQL cloud database, Prisma ORM for schema management, and Vercel Analytics for usage tracking

Strumly – ML-Powered Air-Guitar Chord Recognition System *Nov 2025*
Python, OpenCV, scikit-learn, Random Forest, Landmark Detection

- Built a real-time air-guitar system using MediaPipe for hand landmark tracking and a Random Forest model trained on custom datasets, achieving 94% chord classification accuracy.
- Detected all major guitar chords across 3 modes — Free Mode, Practice Mode, and Song Mode — for a complete learning and playing experience
- Collaborated with a teammate using Git for version control and workflow management

Venty – AI-Powered Journaling Platform *Apr 2024*
React.js, Node.js, Express.js, MongoDB, LangChain, Hugging Face

- Used DistilRoBERTa for real-time sentiment analysis to classify user emotions from journal entries.
- Built and deployed a custom Node.js/Express backend on Render with a responsive React frontend on Vercel.
- Designed a conversational AI bot trained to provide comforting and advisory responses based on the user's daily experiences or issues.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript
Web & Frontend: React.js, React Native, Next.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js
Databases: MongoDB, MySQL, PostgreSQL
ML/AI: LangChain, Hugging Face Models, Groq API (LLaMA 3.3)
Tools & Platforms: Git, Vercel, Render, Figma, Prisma, Neon
Auth & Security: JWT, HTTP-only Cookies, Middleware-based Route Protection
DSA Practice: Solved 80+ LeetCode problems (Easy–Medium); strong in arrays, two pointers, hashing and binary search.

Leadership Experience

Member, amFOSS (Free and Open Source Software Community) Nov 2023 – Feb 2025
amFOSS is one of India's leading open-source and programming clubs, fostering innovation and knowledge-sharing among students.

- Collaborated with a team of 30+ developers on open-source projects using Git and GitHub workflows.
- Led Figma design for Hacktoberfest events organized by amFOSS, improving project presentation and UX.
- Contributed to ICPC website redesign using HTML, CSS, and JavaScript alongside faculty mentors.

Social Student Responsibility (SSR) Initiative Nov 2025

- Conducted a session titled "School to Society: Journey towards Inclusion and Empathy" for 35 eleventh-grade students at a government school in Trivandrum.
- Collaborated with a team to raise awareness on inclusion, empathy, and social sensitivity as part of a college-led social responsibility initiative.

Certifications

Google Foundations of UX Design (Coursera) Aug 2024
Covered topics: user-centered design, accessibility, usability testing, and design systems.

Area of Interest

Web Technologies, Artificial Intelligence, Mobile Development, Machine Learning

Soft Skills & Interests

Soft Skills: Communication, Teamwork, Adaptability, Problem-solving, Creativity
Languages: English (Fluent), Hindi (Native), Malayalam (Proficient)
Hobbies: Reading, Sports, Writing
