Profile / Summary

Electronics and Computer Engineering undergraduate and current SDE Intern at Bolt.Earth, building full-stack web applications and REST API backends with Node.js, TypeScript and PostgreSQL. Shipped an internal B2B platform with secure AWS-based authentication, and built a deployed AI-powered web app using LLM APIs. Active open-source contributor with a solid foundation in data structures and algorithms, looking for a software engineering role in backend or full-stack development.

Experience

Software Development Engineer Intern – Bolt.Earth Aug 2026 – Present
Node.js, Express.js, PostgreSQL, Next.js, AWS Cognito, AWS S3, Kubernetes

- Built an internal B2B dealer ordering platform end-to-end (Next.js frontend, Node.js/Express REST APIs, PostgreSQL), replacing manual dealer ordering with a single self-serve workflow.
- Developed a companion admin tool to manage dealer sites and onboarding, giving internal teams one place to handle day-to-day dealer operations.
- Implemented secure authentication and access control using AWS Cognito, MFA and Microsoft Entra ID; integrated AWS S3 for document and file storage.
- Shipped services to Kubernetes and worked in a Jira-based sprint workflow with code reviews through GitHub pull requests.

Projects

CeeVee – AI Resume Skill Gap Analyzer *March 2026*
Next.js, TypeScript, Node.js, PostgreSQL, Prisma, Groq API (LLaMA 3.3 70B), Fuse.js, Recharts GitHub

- Built and deployed a full-stack web app (Vercel + Neon) that compares a user's resume against a job description and shows missing skills, ranked by priority, on an interactive Recharts dashboard.
- Created a PDF/DOCX upload pipeline with file-type and size validation, input sanitization and text extraction, so malformed or malicious files are rejected before processing.
- Integrated the Groq LLaMA 3.3 70B API for skill extraction, STAR-format bullet rewriting and personalised learning roadmaps for each skill gap.
- Implemented fuzzy skill matching with Fuse.js to handle variations in naming (e.g., "JS" vs. "JavaScript"), and designed the Prisma/PostgreSQL schema behind the REST API.
- Secured the app with JWT in HTTP-only cookies and middleware-based route protection.

Education

B.Tech in Electronics and Computer Engineering – Amrita Vishwa Vidyapeetham, Kerala Aug 2023 – Present
CGPA: 7.51 / 10 • Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

Secondary and Senior Secondary Education (Class 10th & 12th) – Amrita Vidyalayam, Kerala 2013 – 2023

Technical Skills

Languages: TypeScript, JavaScript, Python, C++, SQL
Backend: Node.js, Express.js, REST API design, JWT / OAuth 2.0 authentication
Frontend: Next.js, React.js, Tailwind CSS, HTML5, CSS3
Databases: PostgreSQL, MongoDB, Prisma ORM
Cloud & Tools: AWS (Cognito, S3), Kubernetes, Vercel, Git/GitHub, Jira, Figma

Open-Source & Leadership

Member, amFOSS (Free and Open Source Software Community) Nov 2023 – Feb 2025

- Collaborated with 30+ developers on open-source projects using Git branching, pull requests and code reviews.
- Led Figma UI/UX design for amFOSS's Hacktoberfest events, coordinating with the design, development and event teams; contributed to the ICPC website redesign.
